I'm Farkhan, a Backend Developer with five years of experience, passionate about continually enhancing my expertise in application development, with a focus on PHP, Javascript, and Golang. My previous role was as a Backend Developer at KGM Bappenas.

SKILLS AND ACCOMPLISHMENTS

- PHP: Native, Laravel, Codeigniter
- Javascript & Typescript: Reactjs, Nextjs, Nodejs, Nestjs, Expressjs
- Golang: Gin, Fiber, Swagger
- Database: MySQL, PostgreSQL, MongoDB
- Operating System: Windows, Linux
- Utilities: Github, Gitlab, Postman, Notion, Figma

WORK EXPERIENCE

Backend Developer | Iney KGM Bappenas, Jakarta
(04/2023) – (12/2023)

> I am working in Bappenas as a Backend developer. I helped to build a dashboard monitoring system about stunting.

Freelance Backend Developer | Joja Creative, Yogyakarta
(08/2021) – (03/2023)

> I am working on three website projects. One is for the Woman International Club in Jakarta. The others are a company profile for Bdrcoal and one for Joja Creative itself. I am collaborating as a backend developer with a frontend developer, a UI/UX designer, and a project manager.

Fullstack Developer | PT Baracipta Esa Engineering, Yogyakarta
(02/2022) – (07/2022)

> I am working on two websites. First, is creating a website to showcase an architect studio's work. Second, I am building an admin dashboard for an architect design marketplace.
